

ARCHITECTURAL TECHNOLOGIST SENIOR

Established in 1969, the Rosati Group encompasses several construction-related companies serving Southwestern Ontario. Through our talented employees, we have a strong base of skills and experiences to make our construction projects and engineered solutions successful.

The position suits a high energy, proactive team player with strong and demonstrated skills in design, design development and working drawings in a fast paced environment. Sharing our commitment to project quality and client satisfaction in a design-build atmosphere, the successful candidate will be able to work in a team environment with guidance from senior staff.

Benefits

- Competitive compensation
- Light hearted humorous atmosphere
- Mentorship and Development
- Family Run business since 1969
- Well-equipped office environment with available resources such as fully equipped gym, fully equipped kitchen, putting green, and bocce court.
- Various team outings and events throughout the year

RESPONSIBILITIES:

- Architectural designing, drafting/detailing including but not limited to:
 - Preparation and production of Architectural and/or structural based drawings such as:
 - Architectural Site Plans
 - Architectural Floor Plans, Reflective Ceiling, Roof Plans and details
 - Building cross-sections and details
 - Room, Door and Window Schedules
 - Steel roof framing plans, Wall framing elevations
 - Foundation plans
- Review and coordinate all drawings to ensure that all working drawings comply with the strict standards and criteria of the Ontario Building Codes, by-laws and appropriate building techniques and practices.
- Coordinate any revisions/mark-ups of working drawings.
- Liaison with sales, estimating, and project management departments, as required for the purpose of preparing working drawings.

SKILL REQUIREMENTS:

- Successful applicant will have minimum 5-7 years' experience.
- Strong organizational skills, as well as excellent verbal and written communication skills.
- Working knowledge of the O.B.C. a must.
- Must have high knowledge and skills with drawing application programs in AutoCad and/or Architectural Desktop. Revit and "BCIN Designation would be considered an asset.
- Must be detail-oriented with ability to check documents/drawings for accuracy, communicate detailed changes and ensure corrections are made across several drawings and building systems.
